

OPEN SCAN® Child Support

Open Scan Technologies, Inc. is the proven choice in child support. Our solution can be found in 16 states across the country. Automating the processing of child support payments, including correspondence, payroll deductions, and multiple checks is our expertise. OPEN SCAN's software solution gives you effective operational control, virtually eliminating misapplied's, providing real-time access to key data, and delivering bottom line savings.

We recognize that your incoming child support payments require extensive human intervention and personalized care. With our solution, manual data entry and inefficient processes to balance and validate the daily workload are automated. Payment information is available to all who need it, providing enhanced customer service.

Our configurable solution is proven to drive administrative performance. The states that have selected OPEN SCAN, process an annual transaction volume upwards of \$9 billion in payments. Our solution streamlines their daily workflow and balances down to the penny, while reducing operational costs by approximately 50 percent.

Implementation of the OPEN SCAN Child Support Payment Solution is delivered through our strategic partner Affiliated Computer Services, Inc. (ACS). ACS, a global Fortune 500 company, has helped governments manage large, complex programs for more than 30 years.

About OPEN SCAN

Open Scan Technologies Inc. offers automated accounts receivable (A/R) process solutions that help clients apply payments faster and with more accuracy. The company's solution delivers the convergence of electronic check deposit, remittance processing, forms processing and cash application, enabling corporations and financial institutions to realize the highest levels of automation, data accuracy and operational savings for their receivables processing environments.

Additionally, OPEN SCAN has more than ten years experience delivering child support payment processing systems to state governments. We understand every aspect of the collections and payment process and have developed the most comprehensive, efficient and accurate image-based workflow available today.
