## **Developer/Architect Denver, CO**

### Position Summary:

Developer/Architects are expected to perform a variety of coding tasks working independently and closely with other developers. They are expected to participate in any phase of production from requirements through testing and documentation. They are relied upon to design applications and subsystems. With enough experience, they will have the opportunity to lead development teams. They are relied upon for design and code review.

### Requirements:

- Degree: CIS or CSEN or equivalent experience.
- Experience with one or more non-web and web programming languages.
- Microsoft Windows programming experience
- Able to work independently to research and resolve issues, but knows when to get help.
- Able to work closely with coworkers—sometimes at the same desk.
- Able to solve complex programming problems quickly.
- Able to design an entire application.
- Ability to tune SQL queries and databases for performance
- Ability to use many common algorithms (heaps, trees, hash tables, genetic algorithms, sorting, searching, compression, etc)

### Preferences:

- Languages: C/C++, VB6, C#, SQL, ASP.NET, Regular Expressions, XML (XSD, XSL, XPATH, XQUERY, etc) , XAML
- Specific Experience: Imaging, Remittance Processing, Banking, Workflow, WWF, WCF, WPF
- Understanding of how high level programming languages are compiled.
- Other operating system experience.

Compensation commensurate with experience and qualifications, full benefits and extraordinary growth potential! Qualified candidates should send a resume in Word format to: [oscareers@openscantech.com](mailto:oscareers@openscantech.com) for immediate consideration.
