U.S. Foodservice, Inc. and OPEN SCAN® to Present at the NACHA Payments Forum

Las Vegas, NV May 19, 2008 – Lynn Hall, CTP, Treasury Manager of U.S. Foodservice, Inc. and Michael Starble, Chief Operating Officer of Open Scan Technologies, Inc. will present “Beyond Remote Deposit Capture” on Monday, May 19, 2008 at 1:30 p.m. at the NACHA Payments Forum in Las Vegas, NV. The conference will be held at the MGM Grand Hotel.

In the wholesale business-to-business payments arena the processing of payment documents tends to be very time and labor intensive. In the past, corporations had limited options: Paying staff or paying a bank to extract data from their remits and checks. This presentation will outline emerging models that leverage the convergence of remote deposit capture, remittance processing, forms processing and cash application to provide corporations the next generation of A/R automation.

###

About U.S. FOODSERVICE®

U.S. Foodservice, Inc. is the second largest broadline foodservice distributor in the United States. It is a full service distributor with more than 27,000 associates in over 70 locations nationwide. The company distributes food and related products to over 250,000 customers across the United States, including restaurants, hospitals, hotels, schools, government institutions, and other establishments where food is prepared outside of the home.

About OPEN SCAN®

Open Scan Technologies, Inc. (OPEN SCAN®) is a premier provider of modular and highly scalable receivables processing solutions that extend the functionality of remote deposit capture and wholesale lockbox. The company's flagship product, RedCap™, delivers the convergence of electronic check deposit, remittance processing, forms processing and cash application at the desktop or in a distributed enterprise environment. Corporations, financial institutions and government agencies of virtually any size realize the highest levels of automation, data accuracy and operational savings for their receivables processing environments.
