## Owens & Minor is an OPEN SCAN® Client

**Denver, CO – June 10th, 2008** – , Owens & Minor, Inc., (NYSE: OMI) a FORTUNE 500 company headquartered in Richmond, Virginia is a user of Open Scan Technologies, Inc.'s RedCap™ Corporate Accounts Receivable Processing software. Owens & Minor is the leading distributor of national name-brand medical and surgical supplies and a healthcare supply-chain management company. Owens & Minor is also a member of the Russell 2000® Index, which measures the performance of the small-cap segment of the U.S. equity universe, as well as the S&P SmallCap 600, which includes companies with a market capitalization of \$300 million to \$2 billion that meet certain financial standards. With a diverse product and service offering and distribution centers throughout the United States, the company serves hospitals, integrated healthcare systems, alternate care locations, group purchasing organizations, the federal government and consumers.

As with other industries, the medical distribution industry evaluates technology investments based on two criteria: Cost savings or efficiency improvement. RedCap™ is unique in that it significantly reduces a companies operational costs and improves the overall efficiency in the A/R department, satisfying both criteria. In any wholesale business-to-business payments arena the processing of payment documents tend to be very time and labor intensive. In the past, this left companies only two options: Paying staff or paying a bank to process the documents and checks. RedCap™ brings a new paradigm to A/R processing, allowing for greater control and accuracy, less cost, and faster cash application.

OPEN SCAN® provides the convergence of three key functions that are critical to delivering full wholesale remittance automation for distribution companies: the ability to capture and integrate images from any scanned source including the bank or a remote deposit location; simplified and fully automated data capture from any unstructured payment form; and automated intelligent A/R matching and cash application.

###

### **About OPEN SCAN®**

**Open Scan Technologies, Inc. (OPEN SCAN®)** is a premier provider of modular and highly scalable receivables processing solutions that extend the functionality of remote deposit capture and wholesale lockbox. The company's flagship product, RedCap™, delivers the convergence of electronic check deposit, remittance processing, forms processing and cash application at the desktop or in a distributed enterprise environment. Corporations, financial institutions and government agencies of virtually any size realize the highest levels of automation, data accuracy and operational savings for their receivables processing environments.
